DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-9 and 17-21, drawn to a resonator, classified in class 181, subclass 213.
- II. Claims 10-16 and 22-24, drawn to a method of damping pressure waves, classified in class 181, subclass 296.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case the resonators of Group I could have second openings which either have a single acoustic inertance greater than a cylindrical geometry or have increased mass flows.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
